

# Montana Adult Basic and Literacy Education (ABLE)

## What is Adult Basic and Literacy Education?

ABLE consists of many community and school based programs across the state of Montana. Through local, state, and federal funds, these programs provide reading, writing, language, and math instruction to help adults gain a GED and/or basic skills that will lead to employment.

## Whom do we serve?

ABLE serves adults age 16 and older who are not enrolled in, or are not required to be enrolled in, secondary school. To be eligible, adults must lack sufficient mastery of basic skills to function in society, lack a high school diploma, and/or lack basic English skills.
